This IREM Chicago Industry Partner Spotlight profile features BELFOR Property Restoration. The worldwide leader in integrated disaster recovery and restoration services. BELFOR is ready for any property emergency, big or small, 24/7/365 to assist with mold, water, fire, wind, asbestos, and everything in between and as a general contractor, can restore your home, life and business.

As a wholly owned worldwide company, we have the resources and manpower to assist when disaster strikes. BELFOR has been in business for over 75 years and while it is globally strong it is locally focused on setting the standard in the industry for response and quality.

BELFOR has assisted in all major national disasters but one story of utmost interest to me is from 2012 and Hurricane Sandy. In NYC, the Depository Trust and Clearing Corporation had a vault 3 stories below street level that contained \$1.4 trillion in Bearer Bonds that suffered flood damage. With assistance from the FBI, SWAT and Homeland Security our crews retrieved the bonds, inventoried, packed and froze them in NYC and shipped them to our Fort Worth facility in armed trucks with chase teams, helicopters and checkpoints along the way. We completely restored 100% of the bonds, saving millions of dollars in replacement cost. There are so many more details to this story - but it is one I find fascinating and shows how we Restore More Than Property!
