This IREM Chicago Industry Partner Spotlight profile features GSF USA -- a sustainable commercial cleaning company that carefully considers the impact of cleaning on people and the planet. They equip their teams with the right cleaning solutions, tools and technology to create safer and healthier environments for their customers and the facility occupants. Their procedures are developed by experts in the GSF-USA global R&D department to ensure their teams follow expert-recommended and proven best practices, and their Écologique cleaning program relies on processes certified by Green Seal®.

Take the step towards greener cleaning today with GSF USA!

Brendon Block

Commercial Development Manager

bblock@gsf-usa.com

317-989-8822

With a newer perspective on the cleaning industry, Brendon joined GSF-USA in May of 2023. After spending 5 years in Account Management, Brendon has shifted his Customer-First attitude towards the World of Clean. Brendon is actively engaged in multiple associations across the Chicagoland area and is well on his way to becoming a household name among those in the industry. You may find him at various BOMA, IREM, CREN, and IFMA events.

When making his jump to the cleaning industry, Brendon saw a huge gap in what industry standards are and what they should be. "The competitive nature of this business has caused companies to lose sight of treating the people doing the work the right way" is how Brendon described the state of the cleaning industry. "The only way we ensure a clean building with happy customers is by investing in our people".
